About AG DENTAL

AG Dental is owned by Allister Griffin (Managing Director). Allister has a degree (with honours) in Agricultural Engineering with Business Management (2001) and first started work in Agriculture Horticultural Environmental Systems.

With experience working with industry leaders like Minerva and Schein in Ireland, Allister was head hunted by Dental Services Direct. In April 2008, Allister started the AG Dental journey from humble beginnings in a garage, a kitchen table and a van.

Allister moved to his first work premises in Portishead then Hambrook before moving to Shrivenham near Swindon in September 2013. The business went from strength to strength, outgrowing many work premises along the way to reach their current premises in 2018 with 3 office areas, upstairs store room, warehouse and a workshop!

Allister now heads up a team of 5 and together they deliver a full offering of dental engineering services and products along with bespoke dental cabinetry services, all to extremely high standards.

Allister Griffin

Managing Director

Welcome Message

"We consider ourselves very lucky here at AG Dental to be part of a team that together brings so much to the Dental Industry and world of Dental Engineering. Our maintenance contracts have been a solid pillar of stability for our clients for many years.

It's vital that we offer this as a bespoke Practice by Practice service and our staff are extremely equipped to deal with designing a package to suit the needs of your Dental Practice.

We hope you find this brochure useful and look forward to answering any further questions you may have."

Allister, Managing Director and Founder, AG Dental

Our Service

Bespoke Maintenance Contracts

Our dental equipment maintenance contracts are fully customised and tailored to the needs and workload of your practice with realistic schedules and ensuring the most economic cost. We provide service reminders so realistic schedules can be put in place to fit around the workload of your practice.

We do not have set service contract pricing for that reason; our dental equipment maintenance contracts are tailored to suit you and available as a monthly payment plan to ease the financial worry.

After a free on site equipment assessment the dental maintenance contract will benefit from inclusive features:

- Call outs for dental equipment breakdown (incl. labour and site attendance)
- Dental equipment servicing
- Use of loan dental equipment

Benefits of a Maintenance Contract

Well maintained dental equipment performs better, gives less trouble and downtime. Planned dental equipment servicing can be carried out at a time which suits you, and faults can be picked up before they cause major issues.

- Bespoke contracts - customers can choose which dental equipment they would like on the contract
- 12 month contract
- Paid monthly*
- Covers annual servicing
- Covers breakdown assistance to the equipment on contract (so no call out charges)
- Customer discount on any parts used (excluding service kits)
- Discounted charges if we attend to equipment NOT on contract

*corporate customers pay annually

What our customers say about our Maintenance Contracts

Reviews

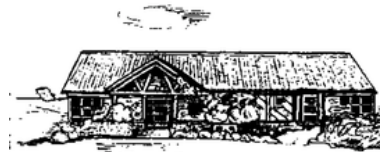

Having a maintenance contract with AG dental gives us piece of mind that all our practice equipment is serviced and maintained annually to a high standard.

DentalCare @ Nailsea

Although we keep a calendar for servicing of each item of equipment its always great to get that email from Emma reminding us that a service is due. It also means that we don't have any large bills to pay throughout the year it's a monthly payment that we can easily budget for budget for.

Wendy, Practice Manager, DentalCare @ Nailsea

AG dental provide a prompt and quality service which is why we use them for our maintenance contract .The staff are always friendly and helpful. I highly recommend this company.

Philippa, Harptree Dental Surgery
